ok - so I am looking for any usable scrap wood. 2x4s, 4x4s, plywood, etc..
Every year my father and I build a haunted house on the lawn for the trick or treaters. This year we need one that will not blow away in the wind. If you have any spare usable lumber or other building materials that may be useful in building a Halloween Haunted House, we would love them. Also when its done, come by for a scare.

If you want to see our house last year, go to <http://www.theboohouse.com>
